

Summary of Completed Assessments

Module	Test Topic	Status	Score
Module 10	IoT Concepts	[PASS]	100%
Module 10	IoT Threats and Attacks	[PASS]	100%
Module 10	IoT Attack Countermeasures	[PASS]	100%
Module 10	OT Concepts	[PASS]	100%
Module 10	OT Threats and Attacks	[PASS]	100%
Module 10	OT Attack Countermeasures	[PASS]	100%

Part 1: Module 10 – IoT and OT Attacks and Countermeasures

The following tests evaluate core concepts in smart device connectivity, industrial automation security, threat vectors, and defensive countermeasures.

Topic 1: IoT Concepts

Test covering what IoT devices are, how smart sensors and gadgets connect to the internet, and how they share operational data.

IoT Concepts

You have minimum required knowledge in this topic.

RETAKE

Topic 2: IoT Threats and Attacks

Test covering common weaknesses in smart devices, such as default factory passwords, unpatched firmware, and hacker botnets like Mirai.

IoT Threats and Attacks

You have minimum required knowledge in this topic.

[RETAKE](#)

Topic 3: IoT Attack Countermeasures

Test covering how to protect smart devices using strong passwords, encrypted connections, secure firmware updates, and network firewalls.

IoT Attack Countermeasures

You have minimum required knowledge in this topic.

[RETAKE](#)

Topic 4: OT Concepts

Test covering Operational Technology (OT) basics, how factory computers (PLCs and SCADA) control physical machines, and the Purdue Model.

OT Concepts

You have minimum required knowledge in this topic.

[RETAKE](#)

Topic 5: OT Threats and Attacks

Test covering attacks on industrial equipment, such as abusing old communication protocols (Modbus), network flooding (DoS), and data theft.

OT Threats and Attacks

You have minimum required knowledge in this topic.

RETAKE

Topic 6: OT Attack Countermeasures

Test covering ways to secure industrial plants, including separate security zones (IDMZ), strict access controls, regular patching, and continuous monitoring.

OT Attack Countermeasures

You have minimum required knowledge in this topic.

RETAKE

Part 2: Verified Progressive Assessment Report

Official progressive report from EC-Council Cyber Quotient verifying that all Module 10 topics have been successfully passed at 100% under student Godwyn Neri:

IoT Attack Countermeasures

Official EC-Council Cyber Quotient Comprehensive Topic Completion Breakdown:

Total Topics	54	VIEW MORE DETAILS
Topics Passed	54	VIEW MORE DETAILS
Topics Failed	0	VIEW MORE DETAILS
Topics Remaining	0	VIEW MORE DETAILS

Module 01: Information Security Fundamentals	
Information Security Fundamentals	Passed
Information Security Laws and Regulations	Passed

Module 02: Ethical Hacking Fundamentals	
Cyber Kill Chain Methodology	Passed
Hacking Concepts and Hacker Classes	Passed
Hacking Cycle	Passed
Ethical Hacking Concepts, Scope, and Limitations	Passed
Ethical Hacking Tools	Passed

Module 03: Information Security Threats and Vulnerability Assessment	
Threat and Threat Sources	Passed
Malware and Its Types	Passed
Vulnerabilities	Passed
Vulnerability Assessment	Passed

Module 04: Password Cracking Techniques and Countermeasures	
Password Cracking Techniques	Passed
Password Cracking Tools	Passed
Password Cracking Countermeasures	Passed

Module 05: Social Engineering Techniques and Countermeasures	
Social Engineering Concepts	Passed
Social Engineering Techniques	Passed
Insider Threats and Identity Theft	Passed
Social Engineering Countermeasures	Passed

Module 06: Network Level Attacks and Countermeasure	
Packet Sniffing Concepts	Passed
Sniffing Techniques	Passed
Sniffing Countermeasures	Passed
DoS and DoS Attack	Passed
DoS and DoS Attack Countermeasures	Passed
Session Hijacking Attacks	Passed
Session Hijacking Attack Countermeasures	Passed

Module 07: Web Application Attacks and Countermeasures	
Web Server Attacks	Passed
Web Server Attack Countermeasures	Passed
Web Application Architecture and Vulnerability Stack	Passed
Web Application Threats and Attacks	Passed
Web Application Attack Countermeasures	Passed
SQL Injection Attacks	Passed
SQL Injection Attack Countermeasures	Passed

Module 08: Wireless Attacks and Countermeasures	
Wireless Terminology	Passed
Wireless Encryption	Passed
Wireless Network-Specific Attacks	Passed
Bluetooth Attacks	Passed
Wireless Attack Countermeasures	Passed

Module 09: Mobile Attacks and Countermeasures	
Mobile Attack Anatomy	Passed
Mobile Platform Attack Vectors and Vulnerabilities	Passed
Mobile Device Management (MDM) Concept	Passed
Mobile Attack Countermeasures	Passed

Module 10: IoT and OT Attacks and Countermeasures	
IoT Concepts	Passed
IoT Threats and Attacks	Passed
IoT Attack Countermeasures	Passed
OT Concepts	Passed
OT Threats and Attacks	Passed
OT Attack Countermeasures	Passed

Module 11: Cloud Computing Threats and Countermeasures	
Cloud Computing Concepts	Passed
Container Technology	Passed
